TANYARADZWA JIMU

TELECOMMUNICATIONS & FIBRE TECHNICIAN

Harare, Zimbabwe
teejimu@gmail.com | +263 777 215 370 | linkedin.com/in/tanyajimu

PROFESSIONAL PROFILE

Telecommunications Technician with 4+ years of equivalent industry experience across fibre optic infrastructure (FTTH, OSP, GPON), broadband services, network installation, maintenance and fault restoration. Hands-on experience installing FTTH/OSP fibre (overhead and underground) at client sites, including connections from FDH, NAP and dome boxes, manually pulling fibre through ducts, terminating and splicing fibre, and testing fibre links with OTDR and optical power meters. Experienced in field work, site surveys, commissioning, technical documentation and after-hours fault response. Holds a Diploma in Telecommunications Engineering and is willing to relocate.

CORE TECHNICAL SKILLS

Fibre installation & testing: Fibre optic installation, termination and splicing; FTTH and OSP installation; FDH, NAP and dome box connections; overhead and underground fibre; manual fibre pulling through ducts; OTDR testing; optical power meter testing; GPON; broadband and data-circuit fault finding.

Network infrastructure: LAN/WAN; TCP/IP; routers and switches; VLANs; structured cabling; patch panels; network cabinets; wireless access points; IP CCTV; VoIP/PABX.

Installation & fault restoration: Installation, commissioning and troubleshooting; service restoration; site surveys; network deployment; technical records, test results and reporting.

Transmission & wireless: Microwave transmission; OSN equipment; antenna installation and alignment; Huawei RRU/BBU equipment; UniFi, Ruckus and Ruijie/Reyee.

Safety & field work: SHEQ/Zero Harm awareness; working at height using cherry pickers and scissor lifts; customer-site work; contractor and multidisciplinary team coordination.

PROFESSIONAL EXPERIENCE

Network & IT Infrastructure Technician (IT Support Specialist) | DeBle Solutions | Kadoma, Zimbabwe
Jan 2025 – Present

- Maintain business network and VoIP infrastructure, diagnosing and restoring wired and wireless connectivity faults across UniFi and Reyee/Ruijie equipment.
- Administer an Asterisk PBX platform and troubleshoot call quality, connectivity and communications service faults.
- Manage user access, remote connectivity and Ubuntu/Docker-based server services, providing technical support to customers and staff.

Telecommunications Technician | Info Relay Systems | Harare, Zimbabwe
May 2024 – Dec 2024

- Installed, commissioned, tested and troubleshot routers, switches, access points and IP CCTV at enterprise and residential sites, supporting 99.9% network uptime.
- Participated in the on-call roster and responded to after-hours faults to restore customer services.
- Manually routed/pulled fibre through ducts as part of fibre and network infrastructure work; supported fibre installation and fault resolution.
- Led a server-room cabinet overhaul within a 24-hour window, documenting, labelling and recommissioning servers, switches, firewalls, UPS units and media converters.
- Conducted site surveys and prepared network design documentation for structured cabling and connectivity deployments.
- Worked with contractor engineers and multidisciplinary teams to deliver fibre and wireless projects safely and to specification.

Network Infrastructure Technician | Nemstech Supplies | Harare, Zimbabwe
Jan 2024 – Apr 2024

- Designed and deployed fibre optic and LAN infrastructure across Tobacco Processors Zimbabwe warehouses.
- Spliced multimode fibre linking warehouses, server rooms, offices and instrumentation equipment.
- Manually routed/pulled fibre through ducts and resolved fibre and wireless connectivity faults.
- Installed Cisco wireless access points at height using cherry pickers and scissor lifts.

Telecommunications Technician | Canlink Private Limited | Harare, Zimbabwe
Feb 2023 – Sep 2023

- Designed and deployed LAN networks, including structured cabling, patch-panel termination and network cabinet installation.
- Installed and configured IP-based PABX and cloud VoIP systems; installed IP CCTV, configured NVRs and implemented client IP addressing.

Telecommunications Technician Trainee | TelOne Zimbabwe | Mutare, Zimbabwe
Mar 2022 – Nov 2022

- Installed FTTH/OSP overhead and underground fibre optic cables at multiple client sites, including connections from the FDH, NAP and dome boxes, and manually pulled/routed fibre through ducts; performed termination and splicing under senior-engineer supervision.
- Used OTDR and optical power meter equipment for fibre-link testing/measurement.
- Configured and fault-found GPON services for enterprise and residential customers, resolving broadband and data-circuit faults.
- Participated in after-hours fault callouts and installed/maintained microwave transmission and OSN equipment.

SELECTED TELECOMMUNICATIONS PROJECTS

- Huawei Base Station & 4G Upgrade: installed Huawei RRU/BBU equipment, aligned Mobi antennas, supported a 2G-to-4G switchover, and connected fibre and power cabling to RRU units.
- NSSA Nationwide Ruckus AP Deployment: installed wireless access points across multiple branch locations nationwide, completing the rollout within three weeks.
- Natpharm Mutare Warehouse: designed and installed LAN, IP CCTV and public-address infrastructure during a staged build, coordinating with electricians, site builders and SHEQ representatives.

EDUCATION

Diploma in Telecommunications Engineering – TelOne Centre for Learning | Graduated November 2024

ADDITIONAL INFORMATION

Driver licence: Holds a Zimbabwean driver's licence. **Field work:** Experienced in on-call and after-hours fault response; willing to relocate and travel to sites as required. **References:** Available on request.
